WORK EXPERIENCE

Statewide Technology Architect

State of Washington - Olympia, WA -

2016 to Present

- Work with diverse multi-functional and multi-agency teams including executives and architects from all business domains to set the technical strategy and direction for the State of Washington. These efforts include the development of statewide strategies, policies, standards, guidelines and best practices that affect over 85 state agencies that operate in a federated IT environment.
- Established and responsible for the growth of a new statewide architectural program in consultation with multiple large and mid-size state agencies with statewide impacts while overcoming the challenges associated with previous attempts that were unsuccessful.
- Consult directly with agencies to enhance their architectural and governance programs as well as investment proposals and technical approaches.
- Provide senior level technical and leadership consulting services to major statewide technology programs.
- Establish tools and mechanisms to align technology architecture with technology business management and major project oversight in order to advance the function of the office including the development of new programs, new tools, new ways to use existing tools, and means to communicate strategy and ongoing efforts across all agencies.
- Review and make recommendations on proposed major and high-risk investments regarding alignment and technical approach.

Operations, Technology and Enterprise Architecture Consultant

American Red Cross-Disaster Services - Washington, DC -

2011 to 2016

- Recruited to provide senior and executive level business operations, information technology, and disaster services leadership across Disaster Cycle Services.
- Provided disaster / emergency operations leadership, planning, and coordination on disaster responses by directing operations, response planning, and resource allocation / application as part of an integrated operations management team on multi-million dollar disaster responses.

- Assisted with the development and implementation of strategies, business models, response plans, policies, and procedures with integration across all levels of the organization and external partners regarding operations management, business and technology systems, competency, capacity, and capability growth.
- Developed, implemented, and maintained enterprise architecture within disaster cycle services.
- Established the vision for multi-million dollar programs and project portfolios targeting business operations and development / acquisition.
- Aligned process and technology solutions with enterprise strategy
- Provided cross-functional support to business owners and solution developers from business and technology inception to delivery and acceptance.
