Authorized to work in the US for any employer

### WORK EXPERIENCE

#### Full Stack Web Developer

Miguel Cabrera's Web Design - January 2016 to Present

I've been developing web applications since I was 17 years old. I started freelance web development in January of this year. I have experience designing websites, authentication systems, eCommerce platforms, transition animation, and front-end design. I love to learn anything that I don't already know and I can build beautiful, responsive, and interactive web applications.

#### IT Field Support Engineer

Workmarket.com & Onforce.com - March 2015 to Present

I provide installations, inventories, and replacement services of specified Information Technology hardware and software to various IT contractors in the Sacramento Area. So far I have repaired robots, maintained networks, repaired printers, repaired operating systems and workstations and installed hardware with a %100 customer satisfaction rating.

### EDUCATION

#### Bachelors of Computer Information Systems in BCIS

DeVry University Online

January 2019

### SKILLS

PHP (7 years)
