

June Rabin

Business Systems Analyst

Waltham, MA - Email me on Indeed: [indeed.com/r/June-Rabin/aaf7880709a7e0b6](https://www.indeed.com/r/June-Rabin/aaf7880709a7e0b6)

Skilled IT Professional bringing over 5 years of in-depth, hands-on experience in large-scale software development using Agile methodologies. Adept at using Java and .NET technologies, alongside object-oriented analysis and design, to complete advanced projects, including distributed web applications, automation tools, multi-tiered components, and SaaS-based applications. Solid abilities in database design, in-depth testing, issue management, and both system and data migration.

Willing to relocate to: Boston, MA - New York, NY - Connecticut
Authorized to work in the US for any employer

WORK EXPERIENCE

IT Professional

Chevron - Makati City -

June 2012 to March 2017

Created complete enterprise applications from scratch, including gathering requirements, composing technical specifications, designing the process of architecture, writing code, testing, and deployment. Integrated with external systems to improve efficiency and meet company standards. Led functional, integration, performance, and user acceptance testing, investigated bugs, and provided solutions. Coordinated between team members, management, clients, and stakeholders, managing customer issues and driving service improvement plans.

IT Professional

Macquarie - Makati City -

April 2011 to June 2012

Monitored system incidents and coordinated response, analyzing data to provide fast, effective solutions during crises for databases, operating systems, and infrastructure. Implemented software patches, and investigated system risks. Developed standard processes and procedures for incident management. Provided advanced technical support to users and day traders.
