### WORK EXPERIENCE

#### IT Project Manager

Washington State Department of Health - Tumwater, WA -

April 2016 to August 2016

(Temporary Assignment) Financial Systems Migration. Migrate the applications and reports used by the DOH Finance Group from a 2003 SQL Server environment to a 2012 SQL Server environment. This included migrating or recreating more than 100 critical daily, monthly and annual Financial Reports.

#### IT Project Manager

DHL Global Forwarding - Tempe, AZ -

April 2004 to July 2015

MGMS Airfreight System. Manage the roll-out of the Multiple Gateway Management System (MGMS) at the largest and busiest Import and Export Gateways in the DHL Global Forwarding (DGF) Air Freight network. This Program typically has no fewer than 100 distinct Projects in the Program Portfolio at any point in time. This is a Multi-Million Dollar Program.

#### IT Project Manager

American Express - Phoenix, AZ -

2002 to 2004

Managed the project to architect, consolidate and migrate a 10 Tb Sybase IQ Data Warehouse over to state-of-the art Sun F15K servers with more than 100 CPUs and a total capacity of 300 Tb SAN attached storage. The migration included the consolidation of four database schemas into one unified model. This Data Warehouse services hundreds of internal users world-wide and provides hundreds of millions of dollars in fraud protection to American Express on an annual basis

### **IT Project Manager**

SUMCO - Phoenix, AZ -

December 1995 to February 2002

Managed this Multi-Million Dollar IT budget across four US Divisions and directed the implementation of all the systems used by the various Administrative groups at this semiconductor facility. Facilitated standardization and consolidation of the JDEdwards Systems and Technology across all U.S. divisions. Hired and managed technical staff and project managers implementing and supporting the Administrative applications. Directed Operations, including NT/Desktop support, Unix System Administration and Oracle Database Administration. Hardware Platforms and Databases included HP-Oracle, AS/400-DB2, RS/6000-DB2 and NT-SQL/Server and the Wide Area Network and corporate firewall consisting of Cisco hardware. 1 recommendation available upon request
