ReactJS (Less than 1 year), Terminal (2 years)

ADDITIONAL INFORMATION

I am a "mid-level" developer with an emphasis on JavaScript development. While my time in the field says
mid-level, my dedication and knowledge is that of a senior-level developer in many aspects. I am quick to pick
up new frameworks and build tools, and integrate technologies when needed. I have developed/maintained
on more that 30 websites, and am currently stepping into the Web Applications world.
